It can also save them as JPEG or PNG files. The tool features a couple of intuitive options that can be quickly figured out, even by those less experienced with such tools. Easy setup and systray integration After installation, the utility gets integrated into the Windows startup sequence, so it automatically runs every time you turn on the computer. However, this option can be later disabled from the settings panel. When it comes to the interface, Climsy creates an icon in the systray at startup and immediately becomes active, reacting every time you record graphical elements to the Clipboard. It's not affected by files, URLs, text, or other types of clips. Upload or save captured images The tool pops
