Add personal and business contacts with personal information, such as name, company, company website, email, twitter and other social media accounts, address, notes, and much more in an easy way. The application includes a simple, clean, easy to use interface. It's designed to be downloaded and installed in a matter of minutes. FRSAddressbook is packed with the most common features that a simple to-do list manager should offer. These features include contacts management, address books, contacts tags, printing and copying to clipboard, among many others. What is new in this release: Version 1.5.5: This update is about fixing various issues and missing features of previous version, including support for Windows 7 (64 bits), bugs in the contact module, and more.

Song Info Tool2.2.1 Song Info Tool Introducing the Song Info Tool, a simple application designed to collect song information of thousands of artists or albums from the Internet. This tool comes as both free software for home and commercial use and Windows software for purchase. The free version of the software comes with limited functionality while the for purchase version of the software offers extended features. With the free version of the software, you can only save song information of up to 500 artists or albums from Internet. Although this is okay if you are just interested in a small number of songs, if you need to collect information about hundreds of songs, then you'll need the tool with extended features.

Song Info Tool Description Song Info Tool is a unique application designed to gather information about artists or albums. It's a tool you can simply download, complete the necessary fields, and save all the data. The tool is ideal if you're a fan of song or artist, you want to learn more about their music, or simply if you want to collect the complete song information of artists or albums that you hear on the radio. Song Info Tool is packed with useful features. Some of these features include album and song search, info categories, share, buy, tag, and many more. What is new in this release: We are continuing to add more features to the latest version of the software. New features are being added as we speak.

- Import contacts from other address books.
- Create and open address books.
- Import contacts from Windows Address Book format (VBA).
- Export contacts to Windows Address Book format (VBA).

Editing of contacts is realized within the interface. Information such as name, address, contact notes and email and fax numbers are entered using conventional keywords. In addition, there are standard fields, such as "Home", "work", "Fax", "cell", "P.O." and "work phone". The utility is a lightweight solution because it doesn't come packed with a huge number of features. As a result, it doesn't have the complexity of other tools that compete with it. It's an ideal solution for those who want a tool for creating and managing simple contact lists and people files. Additional benefits of using FRSAddressbook include:

- Use it with any Windows operating system.
- Enter 09e8f5149f
