The advantage of this method is that it is very easy to add a number of SketchUp layers or nodes to a scene. But the disadvantage is that all of the nodes have the same attributes and functions. To get around this problem, you need to add all of the nodes to one scene and then edit that scene to change the attributes and functions. For instance, all of the nodes in this tutorial are created in one scene, but there may be multiple scenes that are useful for rendering purposes. If you would like to. and as rendering engines have become more and more advanced, a well crafted rendering script can make enormous 570a42141b
