Chiptune music is music created using some form of a very limited set of analog sound chips. This genre often has a loud sound and slow tempo. We love it at Dubspot HQ! Play this page on YouTube Do you have questions about key... As for the story, we have no idea. We are not a narrative writing house. The rules were basically just give us your ideas. So, after many prototypes, our team ultimately landed on a style of a second person origin story, where a...The invention relates to oral splinting devices. Numerous splinting devices are known in the art. These devices typically include at least two arms which are adapted to hold a limb in a desired orientation while permitting free movement of the limb. Such arm assemblies typically have a spacing means to permit the arms to be spaced apart a suitable distance apart to enable the limb to be placed in the desired position. These devices are typically used to immobilize the limb for periods of time. Splinting devices of this type
