Folder Archiver [Latest]

Folder Archiver is an application that allows you to archive selected folders into Rar or Zip archives. There are many other features of this application but we'll leave that for you to find out yourself. The program has been created with the user in mind and its aim is to make archiving folders simple and fast. This Windows application will open the archive with WinRAR and allow you to select where you would like the archive saved. Once your folder has been selected, you can specify whether you wish to compress the selected folder into Rar or Zip format. You can also specify whether you wish the archived folder to be compressed on first run of the program or whether you would like it to be compressed when you unpack the archive. A progress bar will indicate the current progress of the archiving and a list of files in the folder will be included in the file list window when you have made changes. You can have a folder ticked in the file list so that it is automatically selected and archiving can begin when you have selected all folders you wish to archive. Once the archive has been created, you can choose whether to delete the contents of the selected folder or archive. The program is easy to use and there is no need to have WinRAR installed. Javascript/PHP/SQL - return array from SQL Server from MySQL Hi I'm trying to pull data from mySQL to my js/php/css. My data is stored in mySQL as an array The data is stored as [0] [1] [2] [3] [4] [5] [6] [7] [8] [9] [10] etc When I call the sql query I want to return the first index into the array but I'm having trouble doing this. My sql query is: \$query = 'SELECT * FROM 'table' WHERE "value" LIKE "????"; \$stmt = \$db->prepare(\$query); \$stmt->execute(); I have tried SELECT * FROM 'table' WHERE "value" LIKE?; \$stmt->bind_param('s', '%'.string.'%'); But then the data is pulled from the DB as a string, not an array. Is there an easy way to get my data out of the DB as an array

WinRAR is a popular archiving application for Windows that has a free version, WinRAR Free, and paid version, WinRAR Pro. With this program, you can perform the tasks of opening and extracting archives, as well as creating and compressing archives. It also has the ability to extract multiple archives at once and supports a wide range of archive formats. Once a file is extracted, WinRAR allows you to view and edit it. And if you are running a 64-bit system, you can also create multi-volume archives. There are also built-in compression tools to compress RAR, ZIP, Gzip, Bzip2, and Lha archives, and you can compress on a single file or folder, or a list of files or folders, which will be stored in a folder. Archive generation is also supported. You can create archives directly from a folder, a file or a group of files, or from a list of files or folders. You can use a password to generate an archive. When generating an archive, it is possible to generate ZIP, RAR and 7z archives. File/Folder Archiver is a folder archiving tool, designed to handle hundreds of archives. This tool will automatically archive all folders in a specified location into separate archives by automating WinRAR. It also supports the creation of many archives in just one command, with both password-protected and un-protected archives. The archive creation can also be initiated on demand, after a specified number of archives have already been created. With WinRAR free, you can select which folders to archive, which archives to create and which archives to delete. You can also specify where WinRAR is located, which archive types (Rar or Zip) to use and if to delete the original file after archiving. All of these features can be accessed from a single window. Requirements: Limitations: 10-day trial SECURE_ZIP Description: Secure-Zip is a professional archiving tool that supports all RAR formats, ZIP archives, 7z archives, Lha archives, and many more. You can compress, decompress, create or extract archives, and it has built-in compression tools to help you do your archiving work quickly and efficiently. When you are finished, Secure-Zip can automatically compress the archives you have created and automatically move them to the proper locations, create a ZIP archive containing all your compressed archives, or create a 77a5ca646e
