A cloud-based version of AutoCAD was introduced in late 2016. Cloud-based AutoCAD can be accessed on a web browser or a device running the AutoCAD mobile apps. The cloud-based AutoCAD is available through the U.S. Cloud Computing Competitions. AutoCAD is used in a wide variety of industries. Commercial users include designers, engineers, architects, contractors, surveyors, and construction managers. Best-selling CAD Software Products Since the first release of AutoCAD in 1982, numerous updates and product upgrades have been introduced. These product upgrades have been released to meet the changing needs of the auto-design and construction industries and to update the software to the newest versions of AutoCAD. While a significant portion of AutoCAD customers are traditional users of the software, the product is also used in many business-to-business (B2B) markets. This includes many industries that might not traditionally use CAD products such as health care, education, retail, manufacturing, insurance, etc. B2B users are growing in number and so are the number of applications that can be performed with AutoCAD, which is why this category has been listed here. Some of these applications include: Mobile AutoCAD AutoCAD is available on a mobile device (either a phone or a tablet) to access and view AutoCAD drawings. The EORTC Breast Cancer Cooperative Group conducted a randomized study to compare the effects of high-dose chemotherapy (HDCT) with or without autologous bone marrow transplant (ABMT) in patients with metastatic breast cancer. Patients received either four cycles of standard-dose cyclophosphamide, adriamycin, and fluorouracil (CAF) followed by whole-brain radiotherapy (WBRT) and consolidation with HDCT (HDCT/WBRT) or standard-dose CAF followed by consolidation with HDCT alone (HDCT/No WBRT). With a median follow-up time of 3.5 years, the 4-year overall survival (OS) rate was significantly increased in patients treated with HDCT/No WBRT when compared with HDCT/WBRT (67% vs 47%, respectively, $P = 0.05$). The 4-year disease-free survival (DFS) rate was similar in the two groups (35% vs 45%, $P = 0.11$). There was no difference in the disease-free interval (DFI) when comparing the two groups (median, 5.6 vs 4.2 months, $P = 0.75$). The results suggest that high-dose chemotherapy followed by consolidation with no radiotherapy significantly improves the survival of patients with advanced breast cancer.Leopold II of Salzburg Leopold II, Count of Salzburg (c. 1300 – 13 August 1338) was Count of Tyrol, Duke of Styria and Duke of Carinthia from 1326 to 1335 and Archduke of Austria from 1335 to his death.
