Autodesk AutoCAD is not only a full-featured desktop CAD system, but also an industry-standard de facto standard for CAD. A key part of the success of AutoCAD is the support of various third-party vendors, including National Semiconductor, Intel, ARM, etc. The SAGE computer system (the super architecture for the Global Positioning System) has evolved into the modernized Global Navigation Satellite Systems (GNSS) using the GPS, GLONASS and Compass, with the advent of the Galileo and soon-to-be-introduced BeiDou satellites. A new, globally interoperable future for GNSS has begun! The GNU/Linux OS has become a strong competitor of Windows and Mac operating systems. Thanks to the company's promotion, the GNU/Linux OS has become the most widely used operating system in the world. These are among the stories from the world of AutoCAD and the "AutoCAD Army." CAD Professionals Today Following the success of AutoCAD, it's now an essential part of any architecture office. Due to its versatility, AutoCAD has found a big place in the construction industry. The annual MidAmerica NCA Salary Survey in 2016 revealed that only two years after the introduction of AutoCAD in 1987, most architecture firms had adopted the software. MADEWO During the time I was doing architectural drafting for about 25 years, I used AutoCAD, and I have a soft spot for it. With its help, I was able to design and create most of my projects. When I started working at a new firm in the 1990s, there was no AutoCAD. I loved learning AutoCAD, and I wanted to spend my free time drafting. I eventually found a colleague at the office who used AutoCAD, and I started helping him with some technical aspects of the application. Then I started doing auto-tracing and digitizing all the 2D drawings in AutoCAD for him. When I saw that he could do the same thing for his clients, I thought it could be really useful. That was how MADEWO was born. Ricky Irizarry (Ricky Reyes) RICKY IRIZARRY My name is Ricky Reyes, and I am a CAD engineer. I have been working in the field of drafting
