In 2012, AutoCAD 2016 became the first version of AutoCAD to hit 100 million units sold. As of 2019, the current version of AutoCAD is 2018. Tutorials and instruction are provided through the AutoCAD Help system and the online "Training Center" which includes training videos, model files, and sample files. AutoCAD can be used to design or create models and drawings of two- and three-dimensional (2D and 3D) objects. AutoCAD's user interface has changed a number of times since its introduction, and some of the interfaces introduced over time have been updated, modified, or replaced. "AutoCAD 2018" works with Windows XP, Windows Vista, Windows 7, Windows 8.1, and Windows 10. "AutoCAD 2015 for Mac" requires Mac OS X 10.6 or later. All other versions require Windows 7 or later. AutoCAD 2016 was the first release of AutoCAD to require Windows 8.1 and Windows 10. The last version to require Windows Vista is AutoCAD 2017. AutoCAD is frequently bundled with other applications in a package called AutoCAD Architectural Desktop (AAD). Most AutoCAD-related licenses come with a perpetual license for AAD. A significant number of AAD packages include CAD Manager, a CAD database management system that stores, manages, and retrieves information about AutoCAD drawings, including the modeling, drawing, and annotation information used to create them. History 1985–1997: Starting with AutoCAD 1983, 3D modeling was introduced with data that was stored in separate file-based computer files known as Component Data Blocks (CDB). Each CDB file was then imported into a single unified 3D file. For example, a 2D building plan was stored as a plan view file, and a 3D rendering was stored in a 3D file. 1997–2006: AutoCAD was re-written from source code licensed from UK CAD Software Company CADSoft; the version before this was AutoCAD 95. The new AutoCAD integrated 3D modeling and allowed a single document to contain both 2D and 3D data. It also included the ability to turn on and off elements (layer visibility) of the 3D model within a 2D drawing. 2006: The first iteration of AutoCAD contained integrated 2D and 3D drawing capabilities.

Since 2008, Autodesk has expanded Autodesk 3D, a CAD program that utilizes the GPS-Satellite Earth Model to display 3D models, into the home market for consumers by moving Autodesk 3D into the Autodesk MarketPlace. Autodesk 3D was initially offered as a subscription model, but by 2012 Autodesk was offering a single-license version for both consumers and small business. In 2014, Autodesk entered the house energy market. The company offers online design services through its company website for Energy Performance Contracts (EPC). But this time, it's not Apple. Instead, Glamour is reporting, the Goop founder is teaming with HBO to launch Goop Life, a new, "magazine-style" show that aims to give women advice about their bodies and relationships. The show, which is being developed by Gwyneth Paltrow, Emma Summerton, and Louise Peak, will premiere in the second half of 2019, according to the Hollywood Reporter. A spokesperson for Goop confirmed that the show "is currently in development" but said, "We don't have anything more to share about it at this time." The report also says that the show will use Gwyneth Paltrow's lifestyle brand Goop, an online and offline retail business that sells health, beauty, and lifestyle products, as its source of inspiration. "Gwyneth's approach, her knowledge, her passion, her global perspective, I think have been a great asset to a lot of brands that are out there," Louise Peak told the Hollywood Reporter. "She's interested in lifestyle, and you get a real sense of that in her lifestyle brand, Goop." According to Gwyneth Paltrow, she's been a huge fan of the HBO show, Lena Dunham's Girls since it debuted more than a decade ago. In 2015, Paltrow told Vogue that she had a long relationship with HBO and that the channel was "very supportive" of her Goop brand. "We've been working with HBO for a long time. We've been really supportive of their shows, of the culture around them, of the people who work there," Paltrow said. "We were
