Reviewer: 0/10User Score: 2 User Review: Not Your Hater?These small colorful fishes exist in a world the size of your fingernail. The Minims is an abstract puzzle platformer game where the player must help the little fishes find their way through a vast landscape of tall and narrow paths. The player controls the Minims by swiping their tails to move and by tilting the phone to pick up and throw the little fishes. We also have fish bones to collect, which is an essential power-up. Once every small fry is complete, they float into the skies and go to sleep, giving you more time for a new batch of fish. Another reviewer of the game said, "You wouldn't be wrong to say that I hate this game." He goes on to say, "this is probably one of the most boring games I have ever played. If you don't think you'll enjoy it, don't give it a try." I'm sorry but, when it comes to games, some people are picky. Review: Reviewer: 2/10User Score: 1 User Review: Stages aren't enough for you?The Minims isn't a game about an adventure, but about finding your way through "permanent" stages where you have to pick and throw the little Minims while trying to advance. There's no real storyline, or even a goal, nor any kind of difficulty to it, but it does offer a sense of accomplishment if you pass every level. Which is good because that's where this game becomes repetitive. The Minims is a rather fun and simplistic puzzle game. It's a good filler game for short stretches of time. Overall, it's enjoyable for both casual and experienced gamers, but it's certainly not worth the price tag. User Review: Awesome!The Minims is a

fabulous game that should be owned by all iPad owners! It can also be played on many Android devices and other mobile devices, but the game is optimised for the iPad. For those on this site that want to criticize this game, don't be so quick to jump to the conclusion that everyone's a horrible person because I enjoyed the game. My reason for enjoying the game is not because of the fact that it's a good or bad game, it's the fact that it's awesome and beautiful. It truly is a game you need to experience. For those of you who are iPad owners,

by Maynerd on April 2, 2013 Last night we all sat down together to play Frontier Hunter: Passage of Darkness, an incredible handheld edition of the BioWare saga and Pickled Poppy has just reviewed it. This game is incredible, it seems that I have nothing more to say about it except "make sure you get this game, you will not regret it. This game will suck you in right to the moment you start playing it" and this time I totally agree with Pickled Poppy. So, I will review it. Ready? A perfect game. Heh, for those who are new to this post, yes that means Frontier Hunter: Erza's Wheel of Fortune. Frontier Hunter: Passage of Darkness, for those interested, is the first handheld edition of the three previous games in the series, Frontier Hunter: The Answer. We will start again and review this version of the game and then we will continue with the other two titles. From the very beginning you will notice how this game is designed and developed with the DS and DS Lite in mind. This time, it's the DSi version, with touch screen controls, as well. That means I have to use the stylus and just try to not look at my big, fat fingers and let my eyes believe that the stylus won't shoot when I want it to and just touch where my fingers should be. I guess the developers know what I am talking about, they really are

simply sensitive. Well, whether they are or not, they have great games for us, right? First things first, this is not like that Thousand Words item. I think I still remember it good after I bought it back when I was a kid. I was so happy with that title! I found that title one day on my parent's local market in 1989 or 1990, I don't know exactly how old I am when I first bought it, yes! I remember that day well because even though I was at school, I was at home, waiting for my parents to get back home when I thought I hear a bell. As the bell was ringing, I started hearing "oh, that must be the paper store!" That meant my parents were almost home, so I rushed to the store to get another title. This was where I saw it for the first time and I immediately got it. I can still remember how happy I
