Elden Ring Online is a fantasy action RPG in which players can build and develop a character and fight with a multitude of monsters at all times. Players can create a well-rounded character by using a wide variety of weapons, armor,

and magic that can have an impact on their gameplay, along with other items that help with their survival. Players can expand their world by using various items to discover the Lands Between and customize their home. The monsters that players encounter are difficult to fight, but their AI is completely responsive. Combat features an action battle system, where players equip weapons and other items to learn new skills, and use these skills to attack the enemies. Players can freely travel to other areas and explore the non-linear world map, building up their character by gathering information and fighting monsters along the way. ■ Features 1. The World of Elden Ring Online: The Lands Between The Lands Between is the world of Elden Ring Online, which is a vast and open world completely different from the eastern continent of Age of Zephyr. In addition to open fields and huge dungeons, there are numerous towns scattered around. The main cities are large, and the number of NPC shops is also large. Many overland dungeons are scattered across the world, which provide a variety of opportunities for players to find items and encounter monsters. You can also visit luxurious temples that are not the typical temples found in other fantasy games. ■ Unique World Map View, Designed with a Free-Spirited Approach Players can freely move around the world map that is non-linear, and the scale and resolution are freely adjustable. Players can freely move around the world map by using the in-game menu. While exploring, players can view the area map or the encounter map to check the status of the monsters they encounter. By pressing the C button, you can also move between the world map and the encounter map. Encounter map: For some areas with high difficulty and map size, the encounter map is shown on the right side of the game screen. The encounter map allows players to check the status of the monster they encountered in the last battle and set their main attack points for the next battle. World map: For areas where monsters are scarce, the world map is shown on the left side of the game screen. You can also check the status of your character on the world map.
