." "What should I tell 'em?" " They wanna know if you're all right." "All right?" "I'm fine." "I'm having a wonderful time." "How's Nickie?" "Not a bad kid." "She's in Kim's room." "She's gonna have to learn how to take care of herself." "She's got nothing to worry about." "Sandra thinks that the father is gonna be a problem in Nickie's life." "Nickie is Nickie." "She'll be a frightened kid." "A frightened kid with a monster for a dad." "I got laid tonight." "Thanks for inviting me up here, Eve." "How'd I know you'd need a good excuse to see me?" "You're making me blush!" "Well, who is the lucky man?" "She's very attractive." "I'm sure she treats you great." "What's he do?" "He's dead, isn't he?" "Well, thanks for the heads up." "Thanks for doin' this, Doug." "Aren't you usually the one taking care of everything?" "Thought you'd take a break tonight, maybe spend a little time with somebody." "Collette, I had a wonderful time with you." "But I know I shouldn't have even called." "No, no, no." "I enjoyed it as much as you did." "Well, I guess that's that." "No." "No, not tonight." "But I would love to do something together sometime soon." "Well, we've been pretty busy the past few days, with doctor's appointments and everything." "You got a great practice." "Why don't you come by later this week, and I'll do my best to make it worth your while." "I'll be around." "That's that, that's that." "OK." "Fine." "Fine." "Nikki, you're not going swimming again, are you?" "Thinking about it." "Maybe you should call your doctor and find out more about the things you're putting in your body." "That doesn't matter." "What I'm taking has nothing to do with the swim." "I think I've found out everything I need to know about the swim." "Like what?" "How about five cents?" "That's all I have." "What do I have to do to get five cents in this city?" "What are you doing?" "Sit down."

Is it true to say that U-turns are stochastic processes? And is it true to say that the U-turn correlation is equal to the total travel time? A: No, it isn't. Here's an example from a lab notebook. People leave the highway in three different directions. Only the first three points on each U turn are recorded. What are the U-turn correlations, and how do they compare to the total travel times? The right-hand figure is a correlation matrix, and the 3x3 diagonal contains the total travel time. The off-diagonal elements are the U-turn correlations. The travel time (in seconds) is a perfectly correlated and white process, with no U-turns. That is, if there was a U-turn at state  $i$ , then (if we know the travel time since  $i$ ) there is some maximum value for the total travel time. If there is a U-turn at state  $j$ , and a previous U-turn at state  $i$ , then you could include both turn angles, as these two previous turns add extra travel time to the U-turn. However, to say that you have two
