The FIFA series of football (soccer) games is released every year, with numerous editions, playable modes and additional content from some of the world's biggest video game publishers. FIFA features many well-known football stars from the world's most famous clubs and leagues, including Cristiano Ronaldo, Lionel Messi, Neymar, Zlatan Ibrahimović and many more. The main gameplay experience is to play football matches, a version of gridiron football, with one team on offense and the other on defense.

What is PES? PlayStation Exclusive is a series of football (soccer) video games released exclusively for Sony's consoles. The series was launched in 1999 with UEFA Champions League 1999. Since then, FIFA-series footballer's licenses have been adopted for every PES game, and the series is considered a successful competitor to the FIFA series. In the PES series, players can control a variety of footballers on a single team. In addition to controlling a player, players can also control a team in solo mode, select their formation and tactics, and choose players according to their attributes (strength, speed, stamina and so on). The player can control each player individually, with the analogue stick acting as a pair of hands that pick up the ball, run and dribble. Features FIFA and PES are closely related games. In fact, there are already over 100 licensed footballers appearing in the football transfer market, which is accessed via the Player Management screen. At this point, players can set up a squad from players available at the club they represent. Intuitive controls Control of the game is simple. The analogue sticks control the player's speed, acceleration and turning. The player can press the joystick to kick the ball, and can lean on the analogue stick to dribble. The kick button is used to use a fast low kick, a long pass, or a sideways pass. Familiar team features Your team can be set up as you want by selecting from various formations (4-4-2, 3-5-2, 4-3-3, 5-2-3, 4-3-1-2, 4-2-3-1 and 4-3-1-2-3). The team can also be built up by selecting to bring in players on the fly. Up to five players can be chosen, one by one. Once one has been selected,
