Photoshop Elements is a tool to edit images, including pictures, videos and other media. Although, it can also be used as a photo editor. Image editing with Photoshop Elements The features of Photoshop Elements are very similar to those of the professional version of the app. Most of the settings are the same, but the interface is simpler and it offers fewer options than Photoshop. As is obvious, you can edit every aspect of your images, you can edit your pictures with actions and plug-ins, you can create layers and effects, you can retouch your images, and you can create templates. Besides, you can organize your images, create galleries, and create a story with your pictures. So, you can use Photoshop Elements like a digital photo album. Q: Get error when referencing a collection of a parent object in a component object? Not sure if the error I am getting is a bug. I am using a mapped object that has an attribute called newobject with a collection of a child object. The child object is what I am trying to access from the mapped object. Mapped object: @Entity @Data @NoArgsConstructor @AllArgsConstructor @Access(AccessType.PROPERTY) @EqualsAndHashCode(callSuper=false) public class LumberProducts { @Id @GeneratedValue private Long ID; private String productName; private String description; private List logs; private List inventoryItems; } Mapped collection: @Entity @Data @NoArgsConstructor @AllArgsConstructor @Access(AccessType.PROPERTY) @EqualsAndHashCode(callSuper=false) public class Logs { @Id @GeneratedValue private Long ID; private String message; } Component object: @NoArgsConstructor @Entity @Data @Inheritance(strategy = InheritanceType.JOINED) @Access(AccessType.PROPERTY) @EqualsAndHashCode(callSuper=false) public class InventoryItems { @Id @GeneratedValue private Long ID; private String itemName; } Usage: @Component public class Inventory { private Logs logs; @PostConstruct public void initInventory(){ logs.getList().add(new Logs()); } } This throws the following error: Cannot find a value for property "logs" with the expected type: "java.util.ArrayList" Does anyone know why? EDIT: When I set logs=null I get the error: Type Status : Error(Invalid) Exception Description: Invalid property 'logs'
