SFX: Music: "Lacuna Passage" by Rainey (The Well) "Ride of the Valkyries" by Kevin MacLeod "Seven Seas" by Kevin MacLeod Welcome to a new kind of science-fiction, where aliens look like us, robots move like us and science does amazing things. Episode 5 introduces the team behind the show, begins the journey to the Void and the adventure starts now. Monster Hunter: World is an action RPG developed by Capcom in collaboration with FromSoftware. It was released for PlayStation 4 and Xbox One on October 27, 2018. Gameplay The hunter-player character takes place on two opposite sides of the hunter's island: the island of Serendia, a lush, open, grassy area, and the island of Port Sarim, a desert dune with oasis-like pockets. The hunter character moves in a third-person view; they can interact with the environment and other objects. Players can dual-wield weapons and can hold up to two weapons at once. Most of the hunting is done in large open environments that consist of large, open plains, jungles, marshlands, and other environments in which the hunter can run, jump, attack, and use a wide variety of weapons. Monster captured during hunting sessions can be kept and fed to the hunter's pet Wyvern. The pet can be trained to grow in size, level, and strength with experience. Monster hunters are also given a set of armor to wear, but armor upgrades can be researched later on. Players can also craft weapons and armor to improve them and add them to their collections. Portal: Series - Season 2 '', the Netflix original television series, has completed production and will begin airing on Friday, January 25th, 2020 on Netflix in all territories around the globe.
