Once again you have the opportunity to become General Boris Medvedev - the true last line of defence against the Zeds. The apocalypse has not been kind to the city, its residents, and the only defence left - a heavy armoured rhino! The Russians would often use those massive tanks to lay siege to anti-soviet bastions in the middle of the war (or just for fun, if you are Boris Medvedev). The game is more of a remake than a sequel, with improvements on the engine and polishing up a lot of the game's features, all while still retaining the most unique aspects of the

gameplay. GAME FEATURES: \* 4 New Weapons - 3 more types of powerful melee weapons (2 are special melee weapons exclusive to the Zeds) \* 3 New Armor - the armor worn by Boris (his “Bishop” armor, the Russian version of the BFG, and the classic Soviet Army outfit) \* 6 New Items - such as the large weapons, other gear for your squad, and more \* 110 New Ammo - everything from the traditional shell rounds to the unique ZEDS-only lethal ammunition \* New Ability - The new ZEDS called Thorzain has totally different control and mechanics but is also great fun and tricky to use \* New Actionable Abilities - you now have 4 other ways to manipulate objects in the environment \* Accessibility Improvements - the levels have been designed to be much easier to play and have a lot less unfair jumps \* 3 New Maps - each of the maps has its own theme that reflect the Soviet design aesthetics \* A Fully-voiced Story Mode along with Story Mode Skins and Difficulty Options \* 7 new exciting Episode in the Story Mode! Become General Boris! Tec-H: 'Zombie Army are not part of a sub-routine, they're not human, they're not even species of life. They don't even obey the rules of nature...'
