Sega Saturn Cartridge Firmware Flasher Download

The Sega Saturn Cartridge Firmware Flasher is a powerful utility that enables users to download and flash their Sega Saturn's firmware to any of the supported firmwares by simply connecting it to their Saturn console and launching the program. After that, the program will send requests and updates from his SD card to the console, and the console will flash the data until the end of the process. If the user selects the "loglevel" option, console will display the process's status, along with the time and progress. The program is able to install the Pseudo Saturn firmwares, as well as restore games and save/load data from the SD card, if there is enough free space. Moreover, this utility can be used to modify your game cart to your heart's content, and export back the save data to your game cart, if there are free spaces. Additional features: Connect your Sega Saturn to a PC via serial cable and connect its USB ports to the PC using a serial to USB adapter. The program will search and load the USB-based device on the console. After closing the program, you will be able to open it again with no problem. Consolidate your save data to a CD. Reset to the factory settings and firmware if you don't like what you have done. After that, you will have access to all of the original games and the game backups, or the save data. Just be careful not to erase your data, as the original installed games may be erased, so you would lose your data. You can also use this utility to modify your Game Area & System Memory to your heart's content, as well as flashing to the original/new CMC (Communication Module). It is possible to install a software protection method, and this is the best way to remove any protection method on your Sega Saturn. Sega Saturn Cartridge Firmware Flasher Screenshots: Sega Saturn Cartridge Firmware Flasher User Reviews: Product Name: Sega Saturn Cartridge Firmware Flasher Date: 2012-11-10 Author: Maximilian Fiebag Review: This product is compatible with true Saturn games (including BIOS, game and cartridge images) and any weird carts, provided that a modchip is not used and also supports all new firmware versions except for the Neo Saturn release. It is compatible with all carts but the Vectrex, VECTREX Advance (VEC) and SECREX series. Sega Saturn Cartridge Firmware Flasher is a utility designed to help advanced computer users flash their Saturn cartridges' firmware to Pseudo Saturn or other similar firmwares. Additionally, some of the firmware versions include certain save data. After modifying their cartridge, users are able to run backup copies (that are burned on CDs) from their Sega Saturn consoles without considerable efforts and without having to rely on a modification chip. It is possible to run backup games after plugging in the modified cartridge. After modding the cartridge, users can also play import games, without region-specific limitations. Among the extra features, it is possible to find booting homebrew games or demos from the SD card, save or load game data directly on the card, access a save game manager. Although this utility is compatible with legacy cartridges, as well, it does not add SD card features to the modified cartridge. In order to change or restore the cartridge's firmware, users have to burn the contents of this tool to a blank CD, turn the console off, plug a supported cartridge in it, turn it on, select the "load CDROM" option from the Multiplayer screen, start the game and follow the on-screen instructions provided.
