Note: after compiling the library, you must delete all the ".apk" files from the "lib" directory before starting the development environment (if you do not, it will be impossible to integrate the App Widget, and you will have to start over!). remero Looks like a good game and one for the kids. But they got this wrong. 1. The app does not support landscape. 2. The app does not support tasker 3. They put useless support in the app on that was never asked for. It would have been nice if there was not support to do anything. Pretty disappointed. Yvonne_K The game looks like a really good one for the kids, which is what I'm really looking for. But it seems to have a bit of a slow start for me on my HTC One. I think the app was still trying to load the app widget. Kevin @ Greanhouse Looks interesting. I'm looking forward to getting a game and checking it out. I'm also interested to see how it runs on a tablets. I'm waiting for the full review. Thats great news! I'm so happy that you will know that before you spend money. 1. The App Widget is not available for tablets

What's new in Touch Down Football Solitaire:

Touch Down Football Solitaire (TDFL) is an online variant of the classic card game solitaire. It was first introduced in May, 2006, and since then, more than 5 million TDFL games have been played, mostly played by people around the world. With the variety of options and the many different modes of play, TDFL is one of the most popular online card games available.

Although the game can be played as a stand-alone game, it is arguably better experienced as an extension of the popular iPhone platform. The original TDFL application was initially released as a free download iPhone app at the iTunes Store in April, 2006, although the app was officially removed from the iTunes Store on January 31, 2011. A revised version of TDFL, which is compatible with both the iPhone and iPad, was released in April 2011, featuring an all new graphical interface, an Online Mode, and a new Sports Mode. TDFL is currently available at the iTunes Store for the iPhone, iPad and iPod Touch. Similar to the traditional rules of solitaire, the goal in TDFL is to form a monochromatic suit in ascending order, from Ace to King of each suit. However, in TDFL, the suits are enlarged, allowing each suit to have a larger collection of cards, and the player can designate a player or a team of players as being their partner in forming the monochromatic suits. New modes of play Online Mode The most-requested new feature in version 1.2 is the online mode for players to play against other players around the world and also to pick a team and compete against other teams. There are four different modes of play when playing online: BEST OF THREE, BEST OF TEN, NIGHTMARE, and LEAGUE. The BEST OF THREE mode is the simplest since the players are both trying to win the tournament game. BEST OF TEN has the advantage that the team that gets to 10 wins before the other team wins is the winner. NIGHTMARE mode lets you have the best of five times for the entire tournament. The LEAGUE mode is played in a league of eight different leagues with four pairs of two, or four individual games played at a time. The games are over after four games, meaning four teams win, and one team loses. This mode gives the players the ability to choose their players and teams to play with. Face Off Mode Version 1.2 added a new

feature, the ability to play face
