should i use windows 7 or 8.1 windows 10 should i upgrade to 16, that is the main question, plus which audio/video card to get want to know everything about getting my pc ready for college, so here we go! so my question is do i need windows 7 or 8.1 and how do i know what audio/video card to get Anime nub. afk windows, badger badger badger. solving windows 10 boot problems I guess its called acpi_osi, its a variable that is used during start up to tell the kernel which ACPI policy to use. The problem with this variable is that it can be set by a user on the command line, and many times with a script. My question is what is the best thing to do with this variable? Should it be globally set, or just set by the system administrator? And if it should be set by just by the admin, what should it be set to? is wine better than virtualbox what motherboard do i need to buy and what should i be getting windows 7 microsoft recommended hello, i am getting the call today from windows telling me that i need to update to a newer version of windows to play his game, for more info please see this link: do i want to update or not? hello, i am getting the call today from windows telling me that i need to update to a newer version of windows to play his game, for more info please see this link: do i want to update or not? windows 10

update hi, im looking for a vista feature that when you open a file (say an xml) in notepad it automatically opens up into a proper xml editor like microsoft wordpad windows 7 no service pack if i had a windows 7 build serial number i could find the update but for some reason there isnt one please help me windows 10 download windows 10 activator does not show does anybody know what is going on? my screen resolution is 1280x1024, a resolution that is too big for the built in windows and my computer tells me that i have no operating system installed.
