I use it for development, but run from time to time live sessions (to collect logs for example) By design I use an encrypted disk for OS and swap. This is the first time I'm running this hyper-v instance, so I didn't setup the disks yet. I just turned it on, started the VM and now it hangs on the Ubuntu boot. markers above map with certain positions I am trying to move the map marker over the map area when the map is zoomed in but the location that the user is dragging the map is fixed. I tried to use the setExtent() method and the moveTo method. I was able to move the marker over the map area, but I wasn't able to move it over the certain position that I have created. As for now, how can I move the map marker over the map area and over the position that I have created? JSFiddle for the issue: A: The parameters for setExtent can be an array, which is now supported by the newer map toolkit versions. For older versions you need to set the position first, then the extent: var myLatLngs = [// set your desired latlngs here]; // first set the location var myLatlng = new L.LatLng(37.421701, -122.083968); var myMap = L.map('map', { center: myLatlng, zoom: 10 }); L.marker(myLatlng, { position: myLatlng, icon: leafletIcon('marker.png'), draggable: true, onMouseOver: function() { myMap.setZoom(12); } }) .addTo(myMap); // then set the extent myMap.setExtent(myLatlngs); Here's a fiddle to play with: e. "For the most part, it comes down to getting into a rhythm," he says. "Once you know that, you can just be in the moment.
