**Timeless: The Lost Castle** is the first-season finale of a British made-for-television fantasy drama TV series, *Timeless*, created by Christopher Bailey. The series, based on Dan Brown's novel *Lost Symbol*, revolves around the Federal Bureau of Investigation's attempt to contain a curse affecting all living beings near four locations: New York City, Washington DC, Lake Tahoe, and a small Illinois town. The story revolves around different members of a paranormal investigative team in different locations, investigating a similar set of circumstances from a past century, as well as the presence of a team of criminals who are also part of the plot. In the finale, these two plot lines eventually come together with the group of criminals investigating the matter. In the UK, the first season finale aired on UKTV Gold on 3 August 2018. In the United States the finale aired on the Sci Fi Channel on 1 December 2018. In both countries, the finale received 0.27 million viewers. Plot The episode begins at a remote lake in Illinois, where Parkerson is brought to an old mansion that the team is investigating. Inside the manor lies a set of pages containing a poem, writing that is somehow understood to be a warning from the universe that must be delivered on a certain date. While analysing the pages, Parkerson develops something horrific on the back of his hand and later says he has had visions of the "dark forces". The team as a whole go to the lake to investigate but they are attacked by a group of armed thugs who seem to be part of a greater conspiracy. While protecting the team, Detective D'Alessio's fiancé Hannah is shot and killed. Two of the team, D'Alessio and Stantz, are rescued by the police and D'Alessio is taken to the hospital, where he appears to die. Meanwhile, in New York City, the team attempts to capture the third incarnation of the Dread using a remote-controlled robot. After they fail, the robot accidentally goes after the man and kills him. His last words, in Latin, state that the third Dread must find the book inscribed with the equation "E = mc squared" and kill everyone who reads it. In Washington, DC, the team eventually finds the "4" hidden inside a secret city library, which contains an ancient book called the *Thalia Regia*, which is a near-complete transcript of a 10th-century treasury of Sumerian objects held
