The most important thing to know about Photoshop is that it is not all inclusive of every feature or shortcut that's available to users. The following sections provide a run-down of the most used and popular features. For more info, check out [www.Photoshop.com](http://www.Photoshop.com). Create your first image In this section, you discover the basics of Photoshop's interface and what tools you'll need to do any type of editing. Creating a new image in Photoshop can be confusing, so we'll guide you through the process step by step. Follow these steps to create a new image in Photoshop: 1. Choose File⇒New. You're brought to the New dialog box, shown in Figure 12-1. 2. You can create a new document of any size, but the most common size is 32 by 24 pixels, which is the size of a standard letter page. 3. If you don't see the standard size, click the button to the right of the color swatches. You're brought to the Attributes dialog box, shown in Figure 12-2, where you can choose a color mode (a graphics mode in which the colors are specified by the RGB component, such as RGB, CMYK, RGB, or grayscale) and resolution (for example, 300 and 300 ppi). Resolutions are less important than color modes in that different color models and resolutions have different effects on the image. **Figure 12-1:** Use this New dialog box to create a new image. **Figure 12-2:** Edit the file properties with the Attributes dialog box. 4. The color mode is set by clicking one of the color swatches at the bottom of the dialog box, and you can edit the resolution (ppi) by clicking the small (+) sign. Photoshop calculates the size and resolution of the image based on what you provide. For example, if you want the image to be 300 dpi and you choose RGB, the image has a resolution of 300 × 300 dpi, or 300 ppi. You don't have to worry about these settings too much for most photographs, but if you're beginning to work with your computer's graphics program, this dialog box can save you a lot of time. 5. Make sure you set the color mode and resolution to the proper values, including size. There are three color modes: CMYK, grayscale
