People came home the night before Christmas and they're all sleeping in their beds. What happens when they wake up early Christmas morning and wake their family up? Well, they leave the bed, run outside, and go get your presents, right? From the makers of The Sims comes a quirky collection of toys and games that come alive the second you press play. You wake up and discover everything is a little different in the morning. Some things work the way they normally do, but then some things work differently. You and your family will face both the happy and the crazy and the questions that come with all of it, from how did this just happen to why did Santa bother to bother to leave a gift for me at all? Each of the games in the game will provide you with simple puzzles, challenges and stressors with the end goal to find something you desire to play. Your energy will be getting drained at a normal pace, but if you take your time you will find yourself feeling like you have won. As you play more of the games, you will gain the power to change how the world plays out around you. Who you know will help you and you will help them in return. Everything you do will either help you, or hinder you, or be completely meaningless. As long as you don't die, you will be okay. Try to survive all the games and see what happens. FEATURES: Toxic Kitchen ( The first game of the game will challenge you to get your life back before you are consumed by the ever-changing world around you. Become fully immersed in your own dream. Help your family keep their sanity and make sure that none of your relations go off the deep end. Toxic Kitchen will be your trial by fire. Toxic Kitchen was designed to be played in a single sitting. You will play as a family, trying to keep everything you own from going up in smoke. Not only will you have to keep your family in line but you will also have to think about the best way to get you and your family out of this situation. There are multiple endings depending on how well you manage to keep the house from incinerating. Be careful, you don't want a garage fire. Whose Line Is It Anyway: A Card Game (

I'm glad you enjoyed the game. I'm thinking about making some more in the future. This one was a little short, compared to some of the other ones I've made. I wrote some scripts in C# for the User Interface, which was really fun! Thanks again for playing! CheeseHead said... Just a quick note: it would

**What's new in The Darkest Tales:**

, Volume 1 Wednesday, July 27, 2012 **THICK AS COLD AS BLOOD** Here it is, The Darkest Tales have officially began! I have some great posts in the works, but be aware, this is the place to see and be heard. I am big on two things... Politics and Eras. I have many interests, so we'll see where they evolve. Also be sure to check out the author bio at the right of the page, because you'll want to know a bit more about this writer and why he started this epic character (and turf) mash up. Let's take a quick look at the cover art and some of the features. Del Rey has been reviewing the finished book with the hope of getting it published in 2013! How do you create this sort of youth? How can you manage to put so much much detail and so many decades into one book? I'm not a historian, so I can only say that all my knowledge of World War II and the years after came from two sources. My father, who was a huge history buff. And a myriad (haha) of movies, plays and novels in English, which I read in high school. But nothing could prepare me for writing World War II as honestly and accurately as a second time. I see so many novels that are not about the real events of World War II, which is deeply tragic. In the years since the war, I have seen so many films, plays, etc. that are fiction, and most of the time they are essentially (and quite normally) as bad as they're even imagining, they're still (all of them) good fun. So Hollywood has tried to pick up the pieces, and I have to say they've been lousy. Movie history is so bad that I'm amazed that Hollywood could ever think of making a good historical film. Yet it doesn't stop them... make historically accurate period films (example: The History of the World War II movies, "Five good daughters," "Lust for Life" comes immediately to mind) and they're still, for the most part, terrible. Many of these movies were set in the present, with period actors playing the historical figures. I think that has to do with the fact that the actors weren't dead, and if they died, so could the film no longer be shown publicly. So they had to use the "behind the scenes" stuff for the "historical
