It is a great option if you want to use a free AV solution. 0 SVG3544 Jun 5, 2017 I have been using the free version for years. I have found the malwarebytes to be the best free antivirus I have used. I have a personal pc and home servers. The system continually scans my pc, and as long as it stays clear, I am good to go. If I receive a virus, I can restart without any issues. It is a simple uninstall and replace of the file. In addition to the system scanning, the free version also has a real time scan that runs once a day. I have noticed that even though it runs, it never slows my system down. So I can confirm that it is working. It is perfect for a light daily scan. The premium version is also worth checking out for their full suite of features. But the free version does all the work, so it makes sense for someone like me. It is the best I have used for any cost. 0 JH61 May 7, 2017 I like Malwarebytes. It's been my go-to antivirus for a couple of years now. 0 SJM90 Apr 7, 2017 While I love Malwarebytes, I cannot comment on how well it works. I first started using it about three years ago. I have not had any problems with Malwarebytes in that time, but I have not had any issues with my computer. I also cannot say how well it works for scanning my phone or tablet. I use it for their free version, and have not been b7e8fdf5c8
