## AutoCAD

Autocad works fine, i just need to activate the keygen I have tried: download the autocad keygen (.exe) run the.exe file uninstall Autocad before running the autocad keygen Both gave me an error: "This process cannot access the file 'C:\ProgramData\Autodesk\Autocad\en\_us\base\_64.exe' because it is being used by another process" I don't know what to do anymore. A: A workaround to the problem is to install Autocad, then to run the keygen from the folder where Autocad is installed. Normally the keygen will work well. This is how it works for me: install Autocad 2018 run the Autocad keygen from the folder where Autocad is installed: C:\Program Files (x86)\Autodesk\Autocad\en\_us As Hollywood continues to crack down on illegal file-sharing services, it may be time for the entertainment industry to enlist the help of the US military. The Pentagon is reportedly looking to create a new division called the Entertainment Industry Operations Command, which would serve as a branch of the US Military dedicated solely to tackling piracy online. The Command's first official task would be to create an arsenal of technology to be used to fight piracy. The entertainment industry has been working with the Department of Defense for more than a decade to develop new anti-piracy technology. The Entertainment Software Association estimates that digital games and movies are lost every year to online piracy, costing the entertainment industry an estimated \$26.5 billion. But now the U.S. military is prepared to take the fight online. In an unusual move, Pentagon officials are looking to enlist Hollywood's help to combat piracy, and they're not making any moves to suggest that the entertainment industry is wrong. The new Defense Department organization would be run by Hollywood's own military-affiliated trade group, the Entertainment Software Association, and would be housed in the Pentagon's Defense Innovation Unit Experimental (DIUx). DIUx is an outgrowth of a group of some of the top military minds that were charged with developing the DARPA Internet Protocol Suite, which could handle thousands of different types of communications signals. DIUx's first project would be to create a five-year plan to help the entertainment industry gain
