Modeling The Autodesk Viewer allows users to review and edit 3D models in the cloud. Finishing The Autodesk finishing suite, originally Autodesk Architectural Desktop, is a set of applications that help architects, designers, and contractors manage building projects, with the goal of improving the quality of the building process. It includes software for architectural design, schematic design, 3D modeling, visualization, drafting, detailing, construction management, and scheduling. The drafting software is used to create and edit 2D and 3D drawings. The schematic design software can be used to create a building database which can be used to create floor plans and 3D drawings. Autodesk Architectural Desktop is also used for project management. Finishing suite is generally used on Windows-based systems, but has also been ported to macOS with the help of virtualization software such as Parallels Desktop, and has been ported to Linux with the help of Wine (formerly called Project Trident). A version for iOS was released in December 2013. In September 2016, Autodesk announced that its architectural software would be available on the Apple Watch, as well as on macOS. On iOS, Autodesk Architectural Desktop runs as a separate app (App Store) or as a plugin to native CAD apps. The software includes the ability to link with Autodesk's cloud App Cloud Services for project management and collaboration, with the ability to synchronize and share work. It includes many of the features of the Mac software. In September 2015, Autodesk released AutoCAD 360 Architecture, a new version of Autodesk Architectural Desktop for Windows. AutoCAD 360 Architecture is the only Autodesk Architectural Desktop released for Windows 7 and Windows 8, which will run in 64-bit only. Autodesk Architectural Desktop runs in a separate window while using the native Windows Aero or Windows 8 UI. On Android, Autodesk Architectural Desktop runs as a separate app (Google Play), and as a plugin to native CAD apps. Autodesk Architectural Desktop can also be used to import AutoCAD DWG files on Android. Autodesk R14 Suite for iOS Autodesk R14 Suite for iPad is a plugin-based Autodesk Architectural Desktop that can be used with Autodesk's cloud App Cloud Services for project management and collaboration. The plugin contains two main components: Viewer - Plugin that allows viewing of architectural ca3bfb1094

The polls closed at 8 p.m. and projections showed incumbent Democrat Bobby Jindal leading with about 40 percent of the vote. Shortly after that, the projections were revised downward to show Jindal with about 37 percent of the vote. As it turned out, that was the last time a statewide election took place in Louisiana before the state's electoral votes were given to Donald Trump. Now, as the Republican governor prepares for the final weeks of his campaign, he's playing the Trump card more than ever. This week he's released a new ad in which he rails against a "deep state" conspiracy against him and declared, "Donald Trump, I'm with you." The ad will air in five key states and is his first national ad. Advertisement: But Trump can't win without Louisiana and the Republicans face an existential threat in the state if he doesn't turn out voters. If Trump doesn't come out in full force in the state he's practically guaranteed to lose, and that's why he's sending resources into the state. Meanwhile, Jindal's trying to win the same way he won in the 2012 general election -- by painting Trump as a racist bigot. The state's lieutenant governor candidate is running to Jindal's right, with a nod to Trump, but he's making the same mistake Trump made, running ads that's paint him as an outsider who will bring change to the state. Jindal is attempting to turn the tables on Trump by claiming he's an agent of change, though he's been one of the most regressive governors in the
