I want to rewrite the url if the page is example.php?id=test to example.php?page=test Here is the code: RewriteEngine on RewriteRule ^example.php?id=test\$ /example.php?page=test [R] And it doesn't work. It stays on the test page. What do I miss here? A: Try RewriteEngine on RewriteCond %{THE_REQUEST} \s/+example\.php?id=test\s& [NC] RewriteRule ^ /example.php?page=test [R=302,L] RewriteCond will prevent further rules from being applied if the conditions are met RewriteRule will only be applied if the rule conditions are met Q: Leaflet.js on footer for mobile navigation Is it possible to put the leaflet.js on the footer on mobile phones and tablets? My website has a landing page and the content on the main page slides in from the bottom, but I'd like the nav bar on the main page to slide up as well. Is there any way to do this? Thanks. A: You can try this: var layerGroup = L.layerGroup(); var map = L.map('map'); map.setView([37, -122], 11); var baseLayer = L.tileLayer('', { max
