A known grinding apparatus utilizes a rotary grinding wheel having a circumferential, circumferential grinding section, and a radial grinding section. The circumferential grinding section and the radial grinding section may be provided with a number of cross-slits extending radially of the grinding wheel. This known arrangement is disclosed in the Japanese Utility Model Publication No. 60-36355. In this known grinding apparatus, glass sheets are retained in the grinding zone between a pair of vertically and horizontally moving grinding wheels. The glass sheets are retained between the grinding wheels due to the circumferential, circumferential grinding section which act, as a pair of pressing members, between the grinding wheels and the glass sheets. This circumferential, circumferential grinding section is provided in the grinding zone so as to be positioned adjacent to the glass sheets. With this known arrangement, it is difficult to retain glass sheets with the circumferential, circumferential grinding section because glass sheets are easily separated from the circumferential,
