Build: January 12th 2017.A special feature of the Mueller report is the sheer volume of detail. It is by far the longest report in history; it contains more than 2,800 pages and 24 appendices. The report is so exhaustive that it actually reads like a detailed project management plan, outlining the course of the investigation, exactly who was involved, what each person did, how long it took, the people it involved, who had knowledge of what was going on. You don't actually read that detail because it's not relevant. You read it because it was meticulously documented in exquisite detail. This was not a report of a mass shooting in a public place that turned into a public shooting. This was a guided missile on the White House. On the night of May 17, 2013, the investigation begins, as a timeline of events shows when Mueller and his team decided to launch an investigation, and when they wrote up their summation. The events begin with that meeting. Remember that story? A bunch of people from the highest reaches of the US government, from the intelligence community, attended a meeting in Crawford, Texas, where they discussed the fact that Russia was launching cyber attacks against people in the United States, specifically the Democratic National Committee. That was the purpose of the meeting.
