Our Customer Service To provide the customers with the best service, we have been working hard on the products and the efficient service system. We are ready to do our best to meet the needs of our customers. What's the difference between bad design and evil design? - ajaimk ====== Aron "Evil" in this case is a semantics problem. Evil doesn't inherently mean bad/wrong any more than death would necessarily be an immediate cause of grief. ~~~ cdr There's a difference in (for example) the first-order ramifications for the world as compared to the second. Its a similar situation in the design of the UI. Some UIs are bad, some are evil, and they both look the same. ~~~ ekm2 Actually, The UI is evil. It has no "natural" way of dealing with non-system data and it has none of the ability to be customized. ~~~ ajaimk I'm not sure I understand. The UI should be as extensible as the app itself. It should allow the end user to extend the user experience. It's great to create a front-end framework that is flexible and extensible but I would really rather use a framework that works specifically for me. I'm the one who starts with the app and that's how I want to end it. Q: Graph algorithm complexity I was wondering about this wiki page It states that for a 2-coloring of a bipartite graph, any maximum matching is c6a93da74d
