The System Event Log (SEL) is a file that is generated at each system start-up. It contains information about events that have occurred throughout the system's lifetime. Event logs are stored in a number of locations depending on the version of Windows you are running. Version Free Toolbar: Windows 8/8.1: Program Features: SEL Viewer offers a number of functions: View: There are two modes of Viewing an SEL, Hex or Text. Hex view displays the entries in hex format, which is the native file format of the SEL, so you don't have to bother with the text editor. Text view is very handy when you want to view the entries in the SEL without actually loading it into the memory. Save: You can save an SEL to an existing file or create a new file. Hex Mode: In hex mode the entries are converted to their hexadecimal equivalent, so you can copy and paste entries into other hex editors. In text view mode you can use your favorite text editor. Text Mode: In text mode the entries are displayed in the text editor.
