# Scooterssunflowersnudists11

scooters sunflowers nudists 11 Scooters Sunflowers Nudists 11 Where you have the reference i have the link of that video A: If you simply want to know if the URL has been modified: var modifiedURL = ""; if(window.location.href.indexOf("#") !== -1) modifiedURL = window.location.href; If you want to grab the link: var link = document.createElement('a'); link.href = ""; if(window.location.href.indexOf(link.href) !== -1) modifiedURL = window.location.href; Or if you are only looking at the last two characters you could use: link.href = ""; modifiedURL = window.location.href.slice(window.location.href.indexOf(link.href) + 2); A: If you want to get the last two characters from the URL, you can use String.prototype.slice(). It will return the last two characters of the URL. var url = ""; var modification = window.location.href.slice(window.location.href.indexOf(url) + 2); namespace json\_skeleton.Benchmarks open System open System.Threading open System.Diagnostics open System.Net open System.Text open System.IO type Config = { url : string [] override url : string option with get = Some url } type PerformanceCounterInfo = { tick : int [] override tick : int option with get = Some 0 } type GetRequests() = let getRequest (config : Config) (requestType : int) (startTicks : int) (numThreads : int) (numRequ f988f36e3a
