What does WinLED do? Tray icon. Live in the tray. Automatic. No drivers. No software to install. Just click on the WinLED icon in your tray and you'll see the current activity on your HDD. Configure WinLED with a simple, intuitive interface. WinLED's simple, wizard-based installation is quick and easy. Preview any color choices you make in the application's configuration. Your data is secure with WinLED. Windows 10 Anniversary Update required. WinLED Features: If you're into minimalistic OS utilities and have often wished that a small, unobtrusive hard drive activity LED existed, and that it was integrated neatly in your system tray, this might just be the most intuitively designed OS utility you've ever encountered. What's more, WinLED is actually fully configurable so you can handpick which partition of your HDD you'd like to monitor and even get that little tray icon to display the current HDD activity via a LED or via a Trend Chart, if you'd prefer. Not only that, but this tiny utility also goes ahead and lets you choose which color set you'd like to use for each. While you're there, you can also set an option that makes it possible to see, in red, all the files and folders on your HDD that are being accessed, at the moment. Additionally, the app also allows you to check and see if any of your drives have been partitioned or formatted, and whether you're losing any data at all, while at the same time providing you with all the relevant details regarding what's going on with

your OS. Furthermore, you're even given some recommendations to enable automatic updates or not and how to set Windows to shutdown automatically when not in use. Here's a complete rundown of what WinLED does and what else it offers: Let your PC act as your own HDD activity monitor and display the current HDD activity. Choose from 3 color sets and get your app to display the activity via a LED. Choose which partition of the HDD you want to monitor. Tell WinLED to hide if any updates are available. Configure WinLED with a simple, intuitive interface. Preview the colors that you're currently using. Configure WinLED with a simple, intuitive interface. Add WinLED as a system service. Check for hidden system files or how
