Diablo 2 Stings Maphack 1.13c Do

What is the required minimum OS version for Diablo 2 1.13c maphack to work? A: You can use Sting on any client version 1.13c or later, as long as its client D2MapVersions.xml is patched to a version at least 1.13c. The Maphack is pretty much the same for all client versions 1.13c or later. The only difference is in the client D2MapVersions.xml. In this case, the Maphack will do the same thing as a normal D2 Loader 1.13c, so it's the same as usual. Info: Since the loadmap was already loaded in the D2Loader, you don't need the special function loadmap anymore and you don't need this init. Since the min_version for the client D2MapVersions.xml in the Maphack is higher than the client version, it just skips the loading of the patched D2MapVersions.xml Since 1.13c, the Client_Min_Version is 32 for all clients. So the Loadmap won't load at all if Client_Min_Version is less than 32. The Loadmap is always the last of the Maphack So you don't need the function do_map_stuff_first anymore You can try yourself. Info about the change of the client D2MapVersions.xml: The client D2MapVersions.xml was replaced by a client specific D2MapVersions.xml. If the client's client D2MapVersions.xml is patched to a lower version than the Maphack, the Maphack just skips the loading of the client specific D2MapVersions.xml. This is why the min_version was raised from Client_Min_Version 15 to Client_Min_Version 32. When you use a Maphack, you just don't get the statusbars anymore (because it's loaded in the D2Loader, not in the Maphack). You don't get the player bar any more (because it's loaded in the D2Loader). But there is no other difference in appearance or functionality of the Maphack. George French Chambers George French Chambers (1827–1908) was a British inventor, writer, barrister, and theologian. Biography George French Chambers was born on 20 January 1827, in
