An interesting new feature in their new version of Suite, namely the ability to 'Crop' the Photoshop PSD. The crop tool is offering a more precise and intuitive way to crop an image than the traditional crop tool. If you're familiar with the crop tool in Photoshop, this is a big change for the better. Adobe has introduced a new look and feel to the PSD files in the new version. They are much easier to navigate from the menu bar and a lot more visually appealing. All the things you may have missed have been right on your screen, as you like to say. It's also a big boon for accessibility. Adobe has also eliminated the use of layers in opening PSD files; instead, users are able to open up individual components of a PSD. However, layers will be added back in a future version of Adobe's Digital Darkroom. So if you still find yourself dragging and dropping layer groups, don't worry; it's been on their to-do list. This is a problem I've noticed with other editors: they load slowly and sometimes don't play nice with a slower PC. With Photoshop, there are a lot of things to think about: the size of the file, the number of layers, the number of color settings, the number of effects, and the number of filters. But probably the most important thing is just having a sufficient amount of memory. It can be a little bit complicated, but once you grasp it, you'll be much faster and more efficient. When opening your Photoshop PSD files created on other platforms, you will notice that without much effort, you can edit the image. You will have to easily maneuver between layers, go to filters and so on. The top bar is now split into four anchors: ink, adjustment, film and export. The Export tab in this version is the same as the previous one, namely where you could find the printer and canvas export options. But the export settings have seen an upgrade. You now get the ability to crop the exported image during the export process. It really feels great to work with Photoshop on an iPad. The interface is accessible, simple and extremely helpful.
