The 30-day trial version comes with a library of filler images that lets you start out with plenty of grungy textures for slightly deep photoshop cleanup. You can resize images, apply basic effects, create a slideshow that also includes captions, or add basic text and vector effects. You will also see a number of advanced adjustments capabilities, such as Content-Aware Fill and the new face region tool in the upcoming release. These capabilities should enable you to improve your images without the need to ever return to a desktop application to create these kinds of effects.
