The Citi wallet card is part of the Citi Rewards Visa card programme, where I earn Citi Points for using my Citi credit card. I have no "rewards" but I can use my Citi card almost anywhere and still earn Citi Points. When you're using most of the online payment gateways, the card is automatically blocked for the online purchases. But, in many cases, there's no need to block my card. Citi Rewards are earned practically on every online purchase I've made. Hello! This is my first post on this forum. I love PS, and it is my go-to app for everything! I've been using PS4 and Photoshop Elements 2013 for some time now, and I really like it. However, I'm looking for a new version of Photoshop. I've tried Photoshop CS6 and was very impressed as I was with Photoshop 7.x. I also used to love the latest version of Photoshop Paintshop, but that has also been discontinued. I'd love to hear your thoughts and opinions on which version of Photoshop would best suit my needs.Thanks! In this Photoshop tutorial, we will learn how to optimize your image with "Adjustment Layer". You can save the image by "Save As" while working on "Adjustment Layer". Nice learning! This "Adjustment Layer" is beneficial for your all graphic design! Introduction for CR: Victor's tutorials about Lightroom. There is one "advanced" tutorial that I really appreciate. I'm sure there are many readers of CR that will also appreciate it. For this advanced tutorial of Lightroom, he works only with RAW files. He uses a tripod. Lately I've learned about the Nikon V3 and it has changed my life as it changed so much my experience as a photographer. I don't follow the latest DSLRs with a viewfinder and focus screen as I am over 65 years old and I still enjoy using the Nikon V3 for my photography at home and at work. The Nikon V3 does not have a viewfinder or a screen and you must adjust focus using the focus lever. I wish more camera manufacturers would make DSLRs that are as user friendly to us old guys, or we can just buy a used wide-angle lens and be done with it. I've never had a problem with the Nikon V3, but the Nikon 1 IR-2, which I used to own with a 32MP sensor, was slower than walking through the green room at a country music concert. Unfortunately Nikon discontinued the Nikon 1 series of point-and-shoot cameras and put it's efforts and resources into a smaller camera, the Nikon D3100, with no viewfinder and only 2MP image sensor. I also had used a regular Nikon 1 model camera and it was difficult to use.
